Call for Papers

The Fourth International workshop on Ad hoc, sensor & Ubiquitous Computing (ASUC-2013) will provide an excellent international forum for sharing knowledge and results in theory, methodology and applications of Ad Hoc & Ubiquitous computing. Current information age is witnessing a dramatic use of digital and electronic devices in the workplace and beyond. Ubiquitous Computing presents a rather arduous requirement of robustness, reliability and availability to the end user. Ad hoc, Sensor & Ubiquitous computing has received a significant and sustained research interest in terms of designing and deploying large scale and high performance computational applications in real life.

Topics of Interest

Authors are solicited to contribute to this workshop by submitting articles that illustrate research results, projects, surveying works and industrial experiences that describe significant advances in the following areas, but are not limited to

### Ad Hoc Computing
- Ad Hoc Networks of Autonomous Intelligent Systems
- Addressing and location management
- Architectures, protocols, and algorithms
- Data management issues
- Mobile ad hoc learning
- Mobile and wireless ad hoc networks
- Mobile agents for ad hoc networking
- Network design and planning
- Novel Architectures for Ad Hoc and Sensor Networks
- Performance Analysis and Simulation of Protocols
- Power-aware and energy-efficient designs
- Quality of service
- Resource allocation
- Security and privacy
- Self-configuring and self-healing schemes
- Services and applications
- Wireless & Mobile network Security
- Wireless sensor network

### Sensor Networks
- Architectures, protocols and algorithms
- Data allocation and information
- Deployments and implementations
- Embedded, network-oriented operating systems
- Energy optimization Hardware aspects of sensor design
- Location management and placement
- MAC protocols for wireless sensor networks
- Middleware and software tools
- Modeling and Performance evaluation
- Radio Issues with other wireless/mobile systems
- Resource allocation, services, QoS and fault tolerance
- Scalability of wireless sensor networks
- Security and dependability issues
- Sensor circuits and devices
- Software, applications and programming
- Under water sensors and systems
- Visualization of sensor data
- Work models

### Ubiquitous Computing
- Architectural structure, design decisions and philosophies
- Autonomic management of ubiquitous systems
- Context and location awareness, context based and implicit computing
- Distributed Computing
- Ubicomp Human-computer Interaction for devices Intelligent devices and environments
- Internet Computing and Applications
- Interoperability and large scale deployment
- Middleware services and agent technologies
- Personalized & special field applications
- Security Issues and Applications
- Service discovery mechanisms and protocols
- Software infrastructures
- System support infrastructures and services
- Ubiquitous systems and trust
- User interfaces and interaction models
- Virtualization over networks of devices
- Wearable computers and technologies
- Wireless networking and mobile, pervasive and ubiquitous computing
- Wireless/mobile service management and delivery
- Mobile Computing
- Network Protocols & Wireless Communication

**Paper Submission**

Submit your papers through Easy chair submission system at Track : ASUC 2013

**NOTE :** Duplicate submissions will be rejected immediately without review.

Manuscripts that do not confirm to the formatting guidelines (Springer format) will be removed from further consideration without review.

Authors are invited to submit papers for the conference through submission system (Easy chair) by 02 April, 2013. Submissions must be original and should not have been published previously or be under consideration for publication while being evaluated for this conference. The proceedings of the conference will be published by Springer (Confirmed). Selected papers from ASUC - 2013, after further revisions, will be published in the International Journals (confirmed). Selected papers from ASUC 2013, after further revisions, will be published in the special issue of the following journal.

- **International journal of Network Security & Its Applications (IJNSA)**
- **International journal of Computer Networks & Communications (IJCNC)**
- **International Journal of Wireless & Mobile Networks (IJWMN)**
- **International Journal of computer science & information Technology (IJCSIT)**
- **International Journal of Ad hoc, Sensor & Ubiquitous Computing ( IJASUC )**
- **International Journal of Advanced Smart Sensor Network Systems (IJASSN)**

**Important Dates**

- **Submission Deadline**: 02 April, 2013 (firm)
- **Authors Notification**: 29 April, 2013
- **Registration & Camera-Ready Paper Due**: 01 May, 2013
- **Conference**: July 13-15, 2013
